

IN THE CLAIMS

This is a complete and current listing of the claims, marked with status identifiers in parentheses. The following listing of claims will replace all prior versions and listings of claims in the application.

1. (Currently Amended) Snuff-box lid having a bottom lid (2) and a cover lid (3), which together define a first enclosed space (11), which is separated from a second enclosed space (13), the first enclosed space (11) being intended for storing used snuff, ~~characterised in that wherein~~ the cover lid (3) is moveably secured to the bottom lid (2) by a hinged joint (4) with end pins (6, 7) which are snapped into corresponding recesses in the bottom lid.

2. (Currently Amended) Lid according to Claim 1, ~~characterised in that wherein~~ in the closed position the cover lid (3) is held against the bottom lid (2) by a snap-locking device.

3. (Currently Amended) Lid according to ~~either of the preceding Claims~~ claim 1, ~~characterised in that wherein~~ in the closed position the cover lid (3) is situated entirely under the upper edge of the bottom lid (2).

4. (Currently Amended) Snuff-box with lid according to ~~any one of the preceding Claims~~ claim 1, a sealing foil being adhesively bonded or welded to the upper edge of the side wall (9) of the bottom container, ~~characterised in that wherein~~ the foil is bent downwards, leaving the necessary room for the space (11) that is defined by the bottom lid and the cover lid.

5. (Cancelled)

6. (New) Lid according to claim 2, wherein in the closed position the cover lid is situated entirely under the upper edge of the bottom lid.

7. (New) Snuff-box with lid according to claim 2, a sealing foil being adhesively bonded or welded to the upper edge of the side wall of the bottom container, wherein the foil is bent downwards, leaving the necessary room for the space that is defined by the bottom lid and the cover lid.

8. (New) Snuff-box with lid according to claim 3, a sealing foil being adhesively bonded or welded to the upper edge of the side wall of the bottom container, wherein the foil is bent downwards, leaving the necessary room for the space that is defined by the bottom lid and the cover lid.
